Community Connection Tip from Ron Glassman

In a power failure, such as after an earthquake, ATMs and point-of-sale devices, which use cards, might not be operable. You might want to have a few days' worth of cash on hand, in small denominations. It could be stored in a home safe. A fire proof wall safe can cost less than \$800. More reasonably priced safes costs between \$100 and \$300. It can be installed by a handyman (see Referral List).
